

## Food Equipment Solution's Electrolyzer System

Using patented technology the ElectroCide System turns ordinary salt, tap water and electricity into environmentally friendly, non-toxic, effective non-chemical cleaning solutions which can be used in a variety of ways. Electrolyzer's Acidic solution can be bottled, stored, and used for up to 60 days while it's Alkaline Solution has an unlimited shelf life.

### ELECTROLYZER SOLUTIONS CAN BE USED IN THE FOLLOWING WAYS:

- Clean and sanitize all countertops, food service equipment, tabletops, bathrooms, stainless steel fixtures and mirrors, and all points of customer contact to reduce the chance of pathogen outbreaks.
- Clean all floors, grout, rugs, and carpets.
- Safe and effective for use in a 3 compartment sink
- Safe as a hand sanitizer to prevent cross contamination of harmful pathogens
- Non-toxic Electrolyzed water can be sprayed directly on to meats, fish, fruits, and vegetables to sanitize and increase shelf life.
- Electrolyzer's sanitization solution works through the same process of phagocytosis that the body uses to prevent infection from harmful bacteria and viruses.

ELECTROLYZER HAS BEEN PROVEN TO BE EFFECTIVE AT ELIMINATING PROTENACIOUS MATERIALS INCLUDING:

<b>Escherichia coli</b>	<b>E. Coli O-157</b>
<b>Listeria Monocitogenes</b>	Salmonella typhi
<b>MRSA</b>	Staphylococcus aureus
<b>Staphylococcus epidermidis</b>	Norovirus
<b>HIV</b>	Enterovirus
<b>Streptococcus pneumoniae</b>	Candida albicans
<b>Streptococcus pyogenes</b>	Bacillus cereus
<b>Kiebsiella pneumonia</b>	Proteus mirabilis
<b>Pseudomonas cepacia</b>	Pseudomonas aeruginosa
<b>Haemophilus influenza</b>	

THE MANY BENEFITS OF ELECTROLYZER ARE AS FOLLOWS:

- Reduces or eliminates the number of chemicals used in the cleaning process and reduces your employee exposure to hazardous materials
- No mixing of potentially harmful and dangerous chemicals means no mistakes and better on the job safety for your employees
